## Tatsuya Matsushita - *Texture Tentacles Interface*

May 2 - June 22, 2013

Tatsuya Matsushita (born 1982, Aichi, Japan, lives and works in Tokyo) returns to the gallery with a new set of collages and sculptures. Going further in his depiction of our mass consumption desires, he develops his fragmented and irrational catalog of the post-modern human basic pulsions : communication, food and sex. His deceptively shimmering compositions are based on a original technique of laminated collage in syntheteic resin.
